Experience

Distributed Autonomous Systems and Control Lab, UMich *Ann Arbor, MI*
Graduate Student Research Assistant *Sept 2022 – Present*
Advisor: Prof. Dimitra Panagou

- Conducting research in the areas of long-horizon energy-constrained planning, informative planning in spatiotemporal environments, and planning under uncertainty. More details on the research questions I have addressed so far can be found here: Research Questions.

AirLab, Robotics Institute, CMU *Pittsburgh, PA*
Visiting Scholar *May 2021 – Aug 2021*
Advisor: Prof. Sebastian Scherer

- Proposed and developed Prioritized-FUEL (Fast UAV Exploration), a hierarchical framework for informative path planning for applications related to reconnaissance missions, such as search and rescue
- Proposed method showed 2 times faster Data Acquisition (test metric) with the same exploration time compared to the existing approach.

Argo AI, Robotics Institute, CMU *Pittsburgh, PA*
Visiting Scholar *May 2020 – April 2021*
Advisor: Prof. John M. Dolan

- Proposed and developed Robust-HRL, a hierarchical reinforcement learning (HRL) based framework for trajectory planning for autonomous vehicles.
- Robust-HRL showed at least 7% higher success rate than the existing state-of-the-art RL and rule-based approaches.
